@import

Javascript

3. Add this code to your website:

```
<link href='http://fonts.googleapis.com/css?family=Lora:400,700,400italic,700italic' rel='stylesheet' type='text/css'>
```

4. Integrate the fonts into your CSS:

The Google Fonts API will generate the necessary browser-specific CSS to use the fonts. All you need to do is add the font name to your CSS styles.

```
font-family: 'Lora', serif;
```

SIKKERHED
